Professor Joseph Agassi,
Boston University,
Boston, Massachusetts,
U.S.A.

21st February, 1968.

Dear *Agassi,*

Thanks for sending me your paper "Science in Flux!" I found it most illuminating in its analysis of Popper's writings and the way they developed.

Your summary of my views shows your disagreement, which is of course very interesting. But you should not quote me ~~as~~ holding the view that commitment is arbitrary. I have written hundreds of pages to show the contrary.

Could you send a copy of your paper to Rom Harre? I am sure he would appreciate it very much.

Yours sincerely,

M Polanyi

Michael Polanyi.
